Personal Profile

Team Lead and Fullstack Developer mastering Frontend skills with React. Backend with NodeJS + Express. DBs: MySQL, Postgres and Firestore. CMSs: Strapi, Wordpress or custom built. A bit of a DevOps too.

Soft Skills

- Team Leader for web development teams
- Good english level, written and spoken.
- Perfectionist
- Attention to details and pixel-perfect design implementations.

Education

University of Bucharest

Bachelor's Degree in Informatics

Projects

Ads management

<http://adstream.com.ro/>

Web apps designed to handle ads management. Features 4 different modules, each with its own backend written in python, specs and user roles. Implemented a shared components library just for these projects.

App features:

- Auth
- Video streaming
- File upload/download
- Real-time update

Stack used:

- Typescript
- Redux Toolkit
- Tailwind CSS
- MySQL
- Python (Flask)

Payment checkout

<https://checkout.bitdefender.com/>

App for managing payments coming from both the main website and their own apps. Features multiple backends served as microservices. Worked on refactoring the whole app, moving from Vanilla JS to React and then implementing Redux Toolkit, fixing bugs in performance and ensuring a better dev and client experience.

App features:

- cross sell
- login via central account
- multiple payment providers (zuora, verifone, stripe)
- multiple countries with locales and different payment methods
- multiple payment flows at once

Stack used:

- Typescript
- Redux Toolkit
- Styled components
- Adyen web dropin
